

Mule - Product Specifications

Concept	Single-wheeled luggage trailer
	Mono-wheel, suspended bicycle trailer for luggage Quick release secured, removable rear wheel, detachable front and foldable rear section for easy transport
Frame construction	
Frame	High-strength CroMo tubing.
Stand/bottom section	BPS (Base-Protection-System) <ul style="list-style-type: none"> • The stand secures bike and trailer while connected. • While the stand is folded during use, it protects the bottom of the Mule. • Self-engaging stainless steel hook secures the stand while folded
Link	CNC machined custom link with SKF ball bearing
Clutch	Quick release clutch for easy connection
Suspension	
Construction	Single arm the construction with a single swing arm keeps the wheelbase of bike to trailer short and reduces dirt exposure of the suspension shock
Suspension travel	Adjustable: 160mm or 120mm 2 shock positions for off-road (more clearance and travel) and or road use (lower weight position and less travel). Tool free change of position.
Suspension shock	Premium air shock, adjustable
Adjustment cargo weight	up to 30kg seamless
Wheels and bearing	
Wheel	18 stainless steel spokes and optimized rims reduce the rotating mass to a minimum.
Bearings	Swing arm and wheel bearing from premium sealed ball bearing
Other	All screws are stainless steel. (except the screw on the cutch! This is a high strength screw!)
Optional Inside Bag	
Made by Arkel	Premium Ripstop Cordura Double walled bottom with PU-Foam filled Integrated dirt- and raincover color: red-black
Accessories	
	Mud guard Battery-free induction rear light.
Size, Weight, Warranty and origin
