

CHIYODA AND CHIYODA XPRESS

The new, trendy Chiyoda models have everything you need when cycling in the city: An urban and stylish comfort bike, fully equipped with Wingee rack and fender, as well as large-volume tires for maximum comfort and riding enjoyment. With their hollow-chamber design, the coated aluminum fenders act as a supporting element for the rack - and almost invisibly.

THE CITY GTS

The new City GTS is an urban speed bike. Equipped with the Shimano Metrea groupset, it unites design, comfort and sportiness like no other bike.

X.OVER.SCRAMBLER

The X.Over.Scrambler is incredibly versatile, and with its wide 27.5" tires, dirt roads and single trails won't stop you. The special bikepacking fork allows you to attach a rack or a bottle holder.

Nominated for the German Design Award 2017.

X.OVER.TRAIL

The X.Over.Trail, a **full-suspension 27.5" bikepacking bike**, extends your range of action like no other. Never before has it been possible to ride even heavily loaded panniers so comfortably and smoothly even on the worst routes. Gravel roads, paths and mountain bike trails become much more fun to ride and can be mastered much more easily on tours. The added comfort offered by the suspension is unique and will teach you to appreciate the difference between a genuine suspension and tire suspension.

GRANDE ROUTE

The new Grande Route remains a classic randonneur enabling cyclists to cover long distances at a sporty pace while retaining seat comfort. The geometry allows for a comfortable seat position, while features such as lightweight oversize tubes, **12 mm quick-release axles at the front and rear** and wider 35 mm tires round off the overall design.

TANAMI GT

In order to offer our randonneur customers greater variety, we have added a GT version of the Tanami to our range. It is available with the Rohloff internal gear hub and the new Shift:R Road or with Shimano derailleur shifting.

PANAMERICANA XPLORE

As the first full-suspension touring bike equipped with a belt drive, the Panamericana Xplore leaves the competition standing. The unique Rapid Belt Tensioner, developed together with the Gates Corporation, combines a low maintenance requirement with high suspension comfort.

SILENT DRIVE

CHIYODA EXPRESS

The large-volume tires not only give the Chiyoda eXpress a new look, but also guarantee maximum comfort and riding enjoyment. The integrated design of fender, rack and lighting is not only stylish, but also stable, lightweight and functional! The pinion gearbox shifts quietly, easily and accurately. The harmonically graduated gears are optimal for everyday use and guarantee an absolutely carefree drive. The Go SwissDrive supports you up to 25 km/h. **Nominated for the German Design Award 2017.**

PANAMERICANA EXPLORE

A new-generation touring bike promises touring with full comfort and a permanent tailwind. The Panamericana eXplore is our **full-suspension e-touring bike with belt drive** and leaves nothing to be desired when it comes to comfort. The unique Rapid Belt Tensioner (RBT) combines a low maintenance requirement with high suspension comfort. Quick-release axles on the fork and chain stay make for increased rigidity and improved handling when fitting and removing wheels. The 250W motor in the rear wheel hub supports speeds up to 25 km/h and is the ideal support with a full load or on hills.

ERGONOMICS AND COMFORT

Our Ergofit concept provides you with a range of carefully selected components covering a broad spectrum and based on years of customer feedback. We use our own high-quality Black Label components, which are supplemented by brands such as Brooks, Ergon, Syntace or Jeff Jones to give you the ideal seat position and ergonomics.

Selle Royal Scientia saddles

The new Scientia saddles from Selle Royal round off our Ergofit concept. The model range offers a variety of ergonomic saddles that meet the individual needs of all cyclists. A recess in the center of the saddle ensures optimum comfort and Royalgel™ at the critical points provides more cushioning. You can configure the saddles as an option with our bikes from September.

Brooks Ergon grips

Excessive pressure in the sensitive palm area causes numb fingers, aching hands and forearms. These ergonomic and anatomically optimized grips offer 100% contact between grip and hand, distribute the pressure effectively and provide a significantly more comfortable feel. The naturally tanned leather makes the grip a pleasingly soft point of contact.

Baramind handlebars

The new Baramind handlebars have a unique cushioning system. Elements flexibly integrated in the handlebars filter out jolts and vibration, reducing the load on your wrists and upper body.

SHIFT:R ROAD für Speedhub 500/14

Riding a drop bar with a fully integrated brake-/shift lever and using it with a Rohloff Speedhub hub is what many riders have dreamed of. The revised interior of the Shift:R II is combined with the excellent braking performance of the TRP Hylex disc brake.

- Shifts up to three gears, allows sporty riding
- Brake-/shifting levers with fully hydraulic TRP Hylex disc brakes
- Ergonomic aluminium brake-/shift levers

PLUG V PLUS

The Plug V is the latest evolution of our fully integrated power supply for your bike. The integrated rechargeable battery makes sure you can also charge your device under difficult charging conditions.

The Plug V plus functions:

- The Rotary-Door twist lock mechanism closes the USB-C port completely and protects it from moisture and dirt.
- Smart Charge: the Plug V plus adapts to the dynamo hub and optimizes the charging current
- The integrated mini-power-bank makes sure you have energy while stopping or going at a slow pace.
- Intelligent Device Management: the integrated charging circuit recognizes automatically your device and negotiates the correct charging current.
- Auto-Light-Switch: switches automatically between the different charging modes. This allows charging and operating the light at the same time.
- Auto-Power-Save: the Auto-Power-Save will be activated automatically depending on the power level of the mini-power-bank and optimizes the buffer functionality.
